We are your maintenance strategy partner, let's Collaborate!

Endeavouring for a well-oiled machine

The ultimate goal of any maintenance department is to ensure that production is not hampered by them. And that's precisely OPSCALE - CMMS helps you to achieve. It is not just software that merely digitizes your operations, it presents a great bandwidth along with an in-depth functionality helping you to monitor your KRAs and KPIs.

A technology to simplify maintenance and improve data visibility

Plant Maintenance Software OPSCALE - CMMS simplifies plant maintenance by enhanced visibility at the shop floor level. Devised with key insights from the industry, it helps optimize plant assets and resources enabling the plant to operate with high asset uptime and peak efficiency. Its ready-to-use reports with accurate plant data, enable a better decision-making for the top management. Thus, it helps the enterprises to scale up their manufacturing as per the market demand.

Simplicity

The system has evolved through the feedback of diverse maintenance users, over the last 20 to 25 years. Hence, it covers most of the practical scenarios that you may face today. OPSCALE - CMMS is a pre-configured system with 95% ready-to-use reports & MIS and can be implemented successfully within 3 to 4 months, with a well-oiled implementation plan.

Scalability

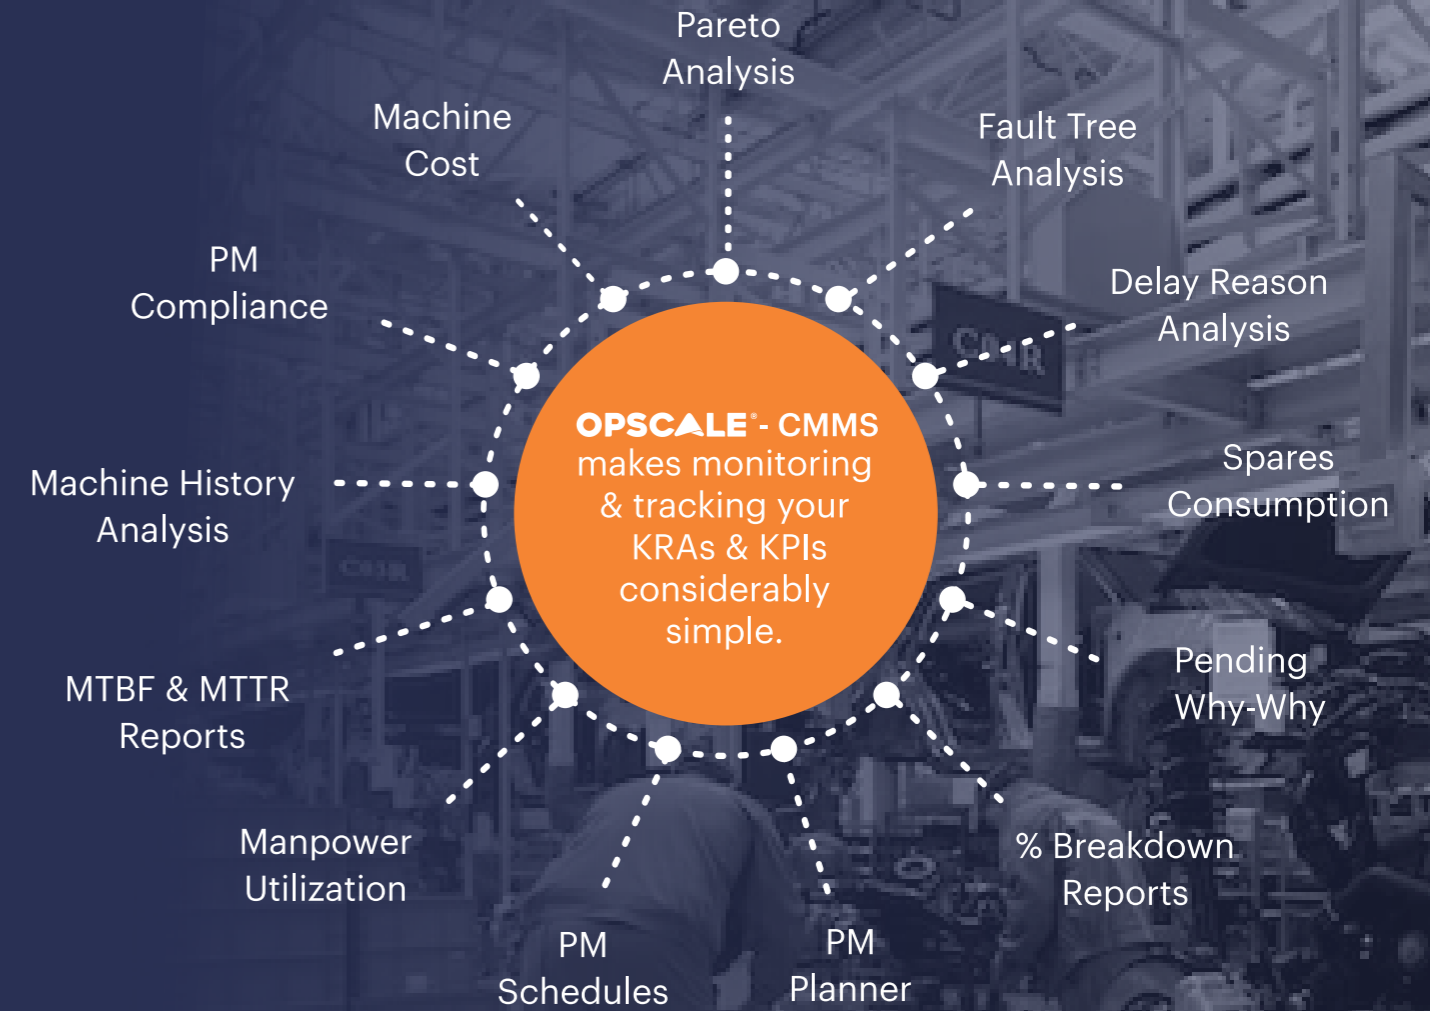

Since CMMS covers all practical aspects of your maintenance operations, we help you in standardizing the system across the machine families so that you get maximum benefit of all its features. It comes with a comprehensive three-level asset register & an in-depth yet simple fault tree, that enables a practical approach towards reliability centered maintenance.

Sustainability

We ensure that your system is up and operational over the years. We are with you during this entire process with our OPSCALE approach to ensure scaling up your operations and helping you set up your maintenance strategy and roadmap for the coming years! This is coupled with periodic utilization reviews to stay on the path and remain there forever!

Ready-to-use reports & MIS to monitor your KRAs

Ready-to-use management dashboard

And along with the above standard reports, FTM also provides a management dashboard with diverse charts for a month-on-month analysis. Over 20+ charts are available in OPSCALE - CMMS.

“ We are Proud of OPSCALE - FTM as one of the Best INDIAN CMMS Software, with the maximum number of Installations across Industry segments. ”

Benefits

Benefits for top management

Increase in overall plant efficiency and throughput

- Comprehensive & centralized Asset Registry
- Fast-track industry 4.0 initiatives more confidently
- Quantifying production loss due to maintenance
- Reduction in unplanned expenses especially spares and repairs
- Comprehensive digitization of the maintenance function
- Enhance machine reliability and production
- Better utilization of productive resources
- Monitor KPIs more easily
- Helps in moving towards a zero-breakdown regime!

Benefits for maintenance engineers

Helps achieve timely maintenance by improving response time

- Resource and manpower allocation made more realistic
- Timely information on all types of planned scheduled maintenance
- Helps to align PM schedules with production
- Helps in critical and overall spares tracking and planning
- Easily record and keep a better track on your repair activities
- Become proactive by using ready-to-use analytical reports, such as Pareto Analysis
- Highly reduce the time spent on preparation of periodic reports and audits
- Take data-centric, informed decisions rather than decisions based on gut feeling
- Your team can also use the CMMS Mobile App to be more responsive in documentation

Benefits for maintenance operations in-charge

Make your life simpler and more stress-free!

- Comprehensive plant structure & centralized Asset Registry up to three levels
- The best tool to build a sound and sustainable maintenance strategy
- Digitization that'll help in creating a centralized knowledge base
- Bring visibility in monitoring continuous improvement processes
- Smoother ISO/TS/Customer Audits
- Spares management made more practical and realistic
- A practical tool to enhance your PM, PDM and Proactive Maintenance
- Brings transparency and smoothness in daily operations
- To-do-lists help in tracking your daily work
- Quickly identify your training needs

Benefits for maintenance department

Get machine updates or job requests anywhere, anytime!

- Saves time and efforts in reporting any job request either using a computer or CMMS Mobile App
- Brings transparency and improves know-how on maintenance operations
- Get breakdown status information on the fly
- Faster and improved SLA with maintenance
- Email notifications, SMS or WhatsApp notifications for auto-communication
- CMMS Android mobile app for real-time requests - raising and closing
- Can incorporate the terminologies you use and is also multi-lingual
- It is easier to train new people with CMMS
- Be totally prepared for any meeting

Ensure **zero-stoppage time** and **total peace of mind** by making the best utilization of CMMS

Breakdown

The right breakdown data will help you eliminate faults, by taking informed action. This module enables you analyze each machine in line with its history of breakdowns. Ensure a hassle-free production by keeping abreast of the plant issues.

Ready-to-use reports based on KRAs & KPIs

- MTBF
- MTTR
- % Breakdown
- Pareto Analysis
- Fault Tree Analysis
- PM Performance
- Spares Consumption

Preventive Maintenance

A simplified and ready to use PM module that helps you develop and maintain a yearly/weekly calendar to track your PM schedules and provide on-time PM compliance.

KRAs & KPIs

- PM Schedules
- Pending PM
- PM History
- PM Compliance
- Spares Planning

TPM

It helps companies to ensure preventive maintenance in a proactive manner. It is achieved with comprehensive data visibility, thus maximizing its operational efficiency.

Aligned with Shop Floor TPM

- Covers Why-Why Analysis
- Action Reports (6W2H)
- Machine Failure
- Ranking Analysis

Breakdown Notifications On The Fly

Now avail recent job requests through the FTM Tablet/Mobile Android App or through a kiosk or PC from the shop floor. Convenient and hassle-free, it helps in timely reporting of issues. It keeps the entire production team connected by the transparent inter-departmental communication.

Ready-to-use reports based on KRAs & KPIs

Month on month breakdown requests that get generated vis-à-vis timely closure.

Spares Management

Helps you to monitor and track movement of spares throughout your maintenance operations.

KRAs & KPIs

- Stock Balance
- Stock Valuation
- Minimum Level Crossover

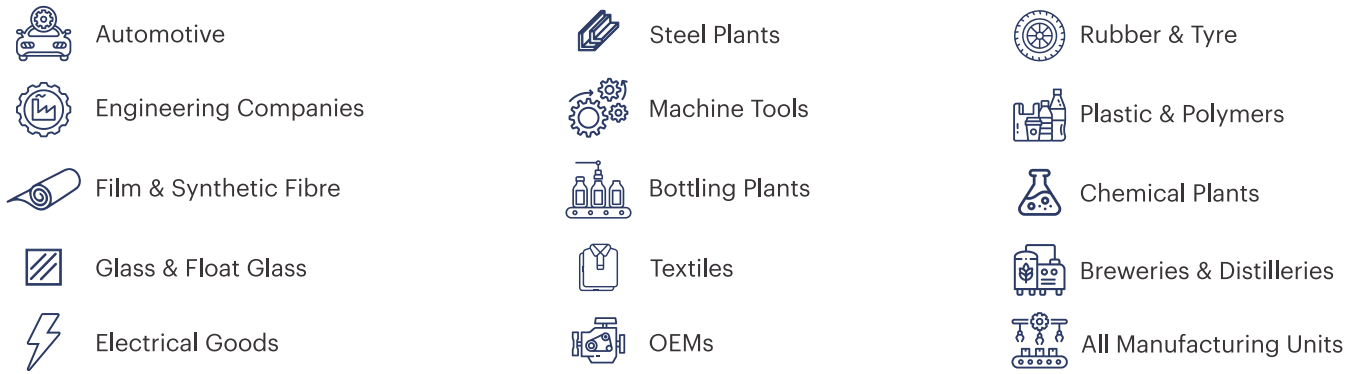

Repairs

Helps track the repair of repairable spares and its history through serial number control. It thereby gives you more control over repairable and recyclable spares, such as motors, drives, spindles, etc. and helps you decide its re-purchase or scrapping.

Other Important Modules

- Condition monitoring using the ABPM or Task Scheduler Module
- Oil top-up on machines – Oils, Lubrication Consumption Module
- To-Do-Lists or Daily Work Management Module to track various tasks
- Contract Management Module (AMC) – track scheduled and unscheduled visits
- Machine Shifting Module – tracking of machine transfers
- Machine Reconditioning & Remodification or Refurbishing Module
- Utility Equipment Monitoring Module

Industries We Serve

Our Clientele

An enterprise software for manufacturing & distribution from Werardt Systemss Pvt. Ltd.

- The Best Made in India Software for Indian Industry
- Backed by 30 years of experience & expertise
- Your Strategy Partner in growth
- We help you achieve Operational Excellence
- Simple, Scalable & Sustainable Solutions
- We work with a Collaborative & Co-creation approach
- The Best Implementation Partner for your Enterprise Software

“ Be rest assured & trust us to get the right solution for your needs. ”

200+ Clients

500 Active Installations

30+ Strong Member Team

5+ Countries Worldwide
